

CAPABILITY STATEMENT 2026

SPECIALIST STAINLESS STEEL CONTRACTOR

Engineering coordination, controlled fabrication and site execution - from definition through documented handover.

PLAN

FABRICATE

INSTALL

COMMISSION

PHARMA | DATA CENTRES | OIL & GAS / ENERGY | MINING
MANUFACTURING | WATER & WASTEWATER | FOOD & BEVERAGE

WHAT WE DELIVER

One coordinated mechanical delivery platform built around stainless steel systems, practical execution and accountable handover.

01 ENGINEERING COORDINATION

Field verification, drafting, constructability and specialist interfaces.

02 MECHANICAL PIPING

Process, utility, hygienic and mission-critical stainless systems.

03 PREFABRICATION

Spools, manifolds, skids, valve stations and modular assemblies.

04 SITE INSTALLATION

Equipment connections, tie-ins, shutdowns and modifications.

05 TESTING & COMMISSIONING

Integrity testing, flushing, readiness and OEM coordination.

06 QA HANDOVER

Test packs, as-builts, records and mechanical completion.

MECHANICAL PACKAGE DELIVERY

Defined around the project, its interfaces and the required level of engineering responsibility.

ENGINEERING TO FABRICATION

Digital coordination and workshop execution brought together around one delivery plan.

01

ENGINEERING COORDINATION

Site surveys and field verification
AutoCAD, Revit and Navisworks
coordination
Layouts, isometrics and shop
drawings

02

WORKSHOP FABRICATION

Stainless pipe spools and manifolds
Skids, valve stations and supports
Controlled TIG and orbital welding

03

CUSTOM TANKS & ASSEMBLIES

Process and utility tanks
Engineered stainless assemblies
Coordinated supply, installation and
testing

SURVEY > DETAIL > FABRICATE > VERIFY > HANDOVER

INDUSTRIES WE SERVE

01 PHARMACEUTICAL & BIOTECH

High-purity utilities, hygienic process piping, CIP/SIP circuits and equipment connections.

02 DATA CENTRES

Chilled water and glycol piping, cooling manifolds, pump and CDU connections.

03 OIL & GAS / ENERGY

Utility and cooling-water piping, dosing skids, stainless spools, manifolds and tank interfaces.

04 MINING

Process and gland water, reagent dosing, washdown, pump skids and brownfield tie-ins.

05 ADVANCED MANUFACTURING & INDUSTRIAL

Process and utility piping, equipment hook-ups, fabricated skids and plant upgrades.

06 WATER & WASTEWATER TREATMENT

Treatment pipework, pump manifolds, dosing skids, filtration connections and water transfer.

07 FOOD & BEVERAGE

Product transfer, hygienic cleaning circuits, tank connections and production utilities.

FABRICATE / INSTALL / TEST / COMMISSION

Defined packages delivered to approved designs, with specialist engineering and inspection coordinated to suit each project.

04 / ASSURANCE & COMPLETION

QUALITY. SAFETY. COMPLETION.

Controls matched to service, specification, code requirements and project risk.

01 MATERIAL TRACEABILITY

Verification, certification and controlled identification.

02 WELDING CONTROL

Qualified procedures, personnel and weld records.

03 INSPECTION & TESTING

Visual, dimensional, pressure and specialist inspection.

04 SAFETY PLANNING

Permits, isolations, supervision and workface controls.

05 COMMISSIONING

Preparation, flushing, integrity and readiness checks.

06 QA HANDOVER

ITPs, test packs, as-builts and turnover dossiers.

PROJECT FRAMEWORKS

ASME B31.3 | ASME BPE | ASME BPVC IX | AS 4041 | AS 3992 | AS 1796 | AS 1528 | ISO 9001

Standards, certification requirements and acceptance criteria are confirmed against each project scope and contract. Reference to a standard does not imply organisational certification.

05 / WHY COMPLETE

BUILT AROUND DELIVERY

Practical workshop and site execution supported by coordination, control and documented close-out.

DELIVERY OWNERSHIP

One accountable delivery team

ENGINEERING SUPPORT

Clear specialist interfaces

CONTROLLED EXECUTION

Planned fabrication and site work

DOCUMENTED HANDOVER

Records, tests and close-out
